Summary

Tech professional with 15 years in the software industry, now moving back into hands-on React development. I started in QA, then worked about 2 years as a React developer at PSafe, shipping internal tools such as an LGPD data-leak monitoring dashboard for B2B customers, before moving into frontend and project leadership. Since 2025 I've been coding again, building revenue dashboards in Vue.js at Lifemed, and I keep sharpening React and TypeScript through personal projects with AI features (Gemini). B.Sc. in Computer Science (2024). I'm looking for a React role where I can grow as an engineer while bringing a senior's understanding of quality, communication and how teams deliver.

Technical Skills

- **Frontend:** React, Next.js, Vue.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, SASS, Styled-components, Vite, Zustand
- **Data & APIs:** REST APIs, Axios, Firebase (Auth, Firestore, Storage), Google Gemini API
- **Tools:** Git, GitLab, Docker (basics), AWS deployments (basics), Confluence
- **Practices:** Responsive UI, data dashboards and charts, SEO on-page, manual and automated testing, Scrum / Agile, code review

Personal Projects

Self-directed projects exploring AI-powered features for end users.

TickFlix — React, TypeScript, Vite, Firebase, Gemini API · [Live demo](#) · [Code](#)

- Movie-themed web app where users ask AI (Google Gemini) to build a personalized timeline based on the patterns and preferences they describe.
- Firebase Authentication login and dynamic content loaded from Firestore.
- Wrote Firestore security rules to allow anonymous reads only where needed (login-screen highlights).

Maibook — React, TypeScript, Vite, Zustand, Firebase, Gemini API · [Live demo](#) · [Code](#)

- Book-writing app where users call AI (Google Gemini) directly from the editor for grammar review and story idea suggestions.
- Components organized with Atomic Design, global state in Zustand, and auth, data and storage in Firebase.

Experience

Frontend Developer — Lifemed · Rio de Janeiro, Brazil *Apr 2025 – Present*

- Build a Vue.js dashboard that shows revenue data for the company and its clients.
- Develop interfaces for medical monitoring platforms, integrated with backend REST APIs.
- Work with product and backend teams to improve usability.

Project Leader — Foursys, client: Safra International Bank · Remote *Apr 2024 – Apr 2025*

- Led delivery of the bank's Next.js web platforms, coordinating the frontend team.
- Ran Scrum ceremonies, prioritized the backlog and aligned requirements with product and UX.

Frontend Developer — PSafe · Rio de Janeiro, Brazil *2017 – 2019*

- Built, with the team, multiple internal tools in React integrated with the company's Node.js REST APIs.
- Main deliverable: an LGPD data-leak monitoring dashboard for B2B customers of DFNDR Enterprise.
- Refactored and debugged React, Angular, HTML, CSS and JavaScript code; worked with GitLab, Docker and AWS deployments.

Other roles: Project Leader at Mercado Livre (2023 – 2024) · Frontend Lead at CyberLabs (2022 – 2023) · Frontend Lead at PSafe (2019 – 2021) · QA Analyst at PSafe (2011 – 2017)

Education

B.Sc. in Computer Science — Estácio, Rio de Janeiro · 2020 – 2024

Industrial Design (8 semesters of coursework) — Estácio, Rio de Janeiro · 2012 – 2016
